THE LAWS AGAINST COINING ONLY APPLIED TO DOLLARS.

The laws against coining only applied to dollars, so that half and quarters might be coined with impunity.

The next case to which we shall call attention is an indictment against one Cheong Asing for coining dollars.

The prisoner was clearly proved to have purchased practically obtained goods, and to have been intimately associated with pirates. He was apprehended on Chinese territory by the gunboat Opussum, and was consequently discharged from the lack of jurisdiction.

This is a new doctrine, it was once brought home in the case of the celebrated pirate Chai-Ang, who was kidnapped at Canton and brought on board the British steamer Phlegelum; by which vessel he was conveyed to Hongkong, tried and found guilty.

The defence rested on the defective jurisdiction, with Chief Justice Hallne overruled, saying it was a diplomatic question with which he had nothing to do—that the trial should proceed.

After three days' trial, the Judge, Mr. Hallne, reading of the law is correct, but strikes at the dictum is most alarming, as being the most direct encouragement to piracy conceivable.

It makes the murders of the Captain of the Chien purporting safe, unless they should have the merit to this colony.

The Mandarins will not apprehend them on Chinese territories, and the British men of war cannot.

The next case refers to the prevailing crime of stealing from a godown.

Our report of the trial has hardly been further continued, as we report it.

Low Ah-chung, Ang Aving, Wou Ayuen, and Lee Ahoy, were charged with breaking into a Warehouse and stealing some bags of pepper the property of the Hongkong and Shanghai Bank.
